Inovata®
CyroLiquid
 SINGLE ACTIVE LIQUID CONCENTRATE FOR SHEEP

A liquid dip for the preventative control of blowfly strike on sheep.

Further Information

Provides up to 12 weeks protection against flystrike caused by common strike flies including the Australian blowfly (*Lucilia cuprina*).

Use when flystrike is eminent including warm & humid conditions.

No known resistance.

The period of protection may be reduced if the product is applied incorrectly, there is excessive fleece soiling, or if wool infection such as mycotic dermatitis is present, or by prolonged heavy rain following treatment, or if used on sheep with less than 6 weeks wool.

For medium term protection (up to 6 weeks) apply at a dose rate of 1mL/1L of water.

Active Ingredients

500 g/L Cyromazine.

Withholding Periods:	Meat	7 Days
	Milk	35 Days
	Wool	60 Days
Dose Rate:	2mL/1L of water
